- May 22 Last Day of School/Early Release
- May 22 Report Card - Quarter 4

INSTRUCTIONS**« Choose the year and beginning month**

Note: If you choose Monday as the start day, you will need to modify some of the formatting in the calendars (bold vs. non-bold days).

Publishing your calendar. If you want to publish a school calendar, you must ensure that it includes the following note and URL in the footer: Calendar Templates by Vertex42.com - <http://www.vertex42.com/calendars/school-calendar.html>

Converting the calendar to a PDF. To publish a school calendar on your website, you should first convert it to a PDF. The best way to do that is to either print to a PDF driver, or in Excel 2010/2013 you can go to Save As and select PDF.

Background colors. The background color for the weekends and blank days are controlled using conditional formatting. To edit the color, go to Home > Conditional Formatting > Manage Rules and select "This Worksheet" from the drop-down box.

Changing the color scheme. You can change the color scheme by going to Page Layout > Themes > Colors.

Overwriting formulas. You can overwrite a formula to place an "H" in place of a holiday for example. Be very careful if you copy/paste days so that you don't mess up the formulas. You can copy/paste the formulas for the days *within* the same month, but *not between* months.

View the Print Area. To view the current print area, first view the Print Preview (Ctrl+P) then return to the Home tab. Or, go to View > Page Break Preview. The print area will become highlighted with a dashed line. To choose a new print area, select the cells you want to include and go to Page Layout > Print Area > Set Print Area.

« Use the **Format Painter** to copy the format from one cell to another

« Copy and paste these **Shapes** to highlight specific days

« Make a list of important dates. Enter dates as text by entering an apostrophe before the date, like 'Aug 8
